Beichuan Ancient Qiang Mill Paint Co., Ltd. was established in 2008 and is located at No. 10, Yuwang Street West, Banaqia Pedestrian Street, Beichuan County, with its plant in Naxi Village, Anchang Town, Beichuan County. It has a land area of more than 5 mu and 28 employees. It is committed to cultivating inheritors for mill paint, one of non-material cultural heritages.

It mainly produces antique furniture and cultural tourist souvenirs such as Gua Pan, Zuo Pan, vase, jewel case and bracelet, achieving an annual productivity of over 80 antique furniture and 800 tourist souvenirs.

Principal raw material of Qiang mill paint is natural raw lacquer, a kind of non-poisonous and pollution-free pure natural paint with main ingredients such as urushiol, laccase, gumminess and water. There is no chemical additive composition in such mill paint. The mill paint products can be considered as one of unique Chinese lacquerwares because they are waterproof, antiseptic, heatproof and wearproof with exquisite workmanship and bright film. Such products are in extremely high use, appreciation and collection value and thus become the best choice for gifts and souvenirs. We have invested RMB3 million in establishing a coordinated mill paint production line.

Chengdu Boshi Machinery Co., Ltd., created by Dr. Qin Jingsong, is a high-tech enterprise specializing in R&D, manufacturing, and sales of new types of wear-resistant materials.

New types of abrasion-resistant pump pipes and series of products manufactured with special alloy materials by the company are characterized by abrasion resistance, impact resistance and tenacity, with a rigidity of HRC64 and a tenacity of 8-15 Joules, which overcome the problem of low resistance to impacts of ceramic-lined composite pipes and have service lives ten times longer than those of ordinary pipeline steel, achieving a leading level in the industry. Products manufactured by the company are widely used to deliver concrete, mining slurry, and coal ashes from thermal power stations, etc. These products are of high values for extensive application and are ideal substitutes for ordinary steel pipes and ceramic-lined composite pipes.

The company applies international advanced twin-wall-structure to design and manufacture abrasion-resistant twin-wall concrete pump pipes, greatly reducing the thickness and weight of pipes compared to one-wall pump pipes. The inner wall is abrasion resistant lined with abrasion-resistant alloy materials, while the outer wall is for protection purpose made of highly resilient seamless steel pipes. This structure offers a perfect solution to the incompatible problem of abrasion resistance and anti bursting and to prevent the risks of bursting and poor abrasion resistance one-wall pump pipes close to the end of service lives. It also greatly extends service lives of pipes, enhance use safety, and increase operating efficiency of pump trucks, creating tremendous values for the lessors and operators of pump trucks. These products, with a delivery capacity of concrete reaching 60,000 m³, have far higher level of abrasion resistance and safety than ordinary one-wall pump pipes manufactured by quenching processes available on domestic market and higher cost performance.

The company is equipped with a group of high-quality scientific and technical personnel. By far, it has applied for eight patents and received patent grants from the government. As a global leading twin-wall pump pipe supplier, the company has developed into a well-equipped and professional pump pipe manufacturer in the industry and been able to provide supporting design, manufacturing and after-sales service of pump pipes (including a full range of twin-wall pump pipes encompassing such special pipes as straight pipes, elbows, outlet elbows, reducers, bend straight pipes) for increasing number of pump truck manufacturers and end-users in the industry.

成都博世机械有限公司是有秦劲松博士创建的，专业从事新型高抗磨材料研发、生产、销售的高新技术企业。

公司采用特殊的合金材料生产的新型耐磨输送管件及系列产品，集高抗磨性、高耐磨冲击性和韧性于一体，硬度达HRC64、韧性达8-15焦耳，克服了陶瓷复合管不耐冲击的缺点，使用寿命是普通管线钢的10倍以上，性能达到行业领先水平。产品广泛应用于混凝土、矿山矿浆、火电灰渣等物料输送，具有良好的推广使用价值，是替代普通钢管、陶瓷复合管的理想产品。

公司采用国际领先的双层结构设计、生产的混凝土双层耐磨泵管，管道厚度及重量较单层泵管大幅减小，耐磨内层为合金耐磨材料，保护外层为高韧性的无缝钢管，完美解决了高耐磨与防爆裂不能兼容问题，克服了单层泵管在使用末期可能爆裂及耐磨性差的缺点，大大延长了管件使用寿命，确保了使用安全性，大幅提高了泵车工作效率，给泵车租赁商及营运商创造了巨大价值。产品耐磨和安全性能远远超过目前国内市场上经淬火工艺生产的普通单层泵管，混凝土输送方量可达6万方，具有非常高的性价比。

公司具有一批高素质科研技术人员，现已申请八项专利并获得政府专利资助。作为目前世界顶级品牌的双层泵管供应商，公司已逐步成长为行业内配套齐全的泵管专业生产企业，能够迅速为行业内多家泵车品牌厂家和终端用户提供泵管配套设计、生产、售后服务，提供包括直管、弯管及出口弯管、变径管、弯直管等各种特殊管件在内的全套双层泵管系列产品。

In 2011, Sany Heavy Industry and Zoomlion Heavy Industry witnessed annual production and sales of 6,000 pump trucks respectively. In 2012, the number increased to 10,000 and amounted to around 20,000, together with XCMG, Foton, Liugong & Hold, Shantui Chutian, CIMC, and XGMA, etc. If all pump trucks replace abrasion-resistant twin-wall pump pipes and pipe fittings (with each set totaling 30,000-40,000 yuan) twice a year, domestic replacement market of inventory will reach six to eight billion yuan with an annual increment of 600-800 million yuan. If the company owns 10% market share, its sales volume will reach 600-800 million yuan with an annual growth of 6,000-8,000 yuan.

宜航航空是以国际化标准建立的一家集航空技术人才开发、航空培训、航空基建、航空运营、航空器研发与生产为一体的创新型航空产业综合运营商。宜航航空总部位于上海虹桥机场，美国总部设于亚利桑那州的格伦代尔。目前公司优先专注于航空飞行人才的培养，目前已经在美国有效开展了直升机和固定翼两大类飞机的商业飞行执照飞行员和飞行教员培养，同时在加拿大开展高级的机务人才的培养。在为中国通用航空飞行人才培养的探索和实践探索出了一条有宜航特色的发展之路。

Easyfly is an innovative, comprehensive aviation operator built with the world standard and is integrated with aviation infrastructure construction, aviation trade, aviation finance, aviation operation, aviation talents development and aviation training. Its Chinese headquarter is located in Hongqiao Airport, Shanghai. Its U.S. headquarter is located in Glendale, Arizona. Easyfly is currently focusing on pilot training and is offering the commercial pilot license training and instructor training for both helicopter and fix wing, as well as the aviation mechanics training in Canada. Easyfly has developed a unique path with its own characteristics for aviation training in China.

Areas of Activity

- General Aviation, Space and Aerospace

Cooperation Profiles

Offer: Training of Pilots 飞行员培训

宜航航空是在民航相关部门和中航工业支持下建立的综合性通用航空集团公司。公司立足中美，面向世界，在通用航空产业链的探索与实践，依据中国航空业发展现状和趋势，进行创新、优化和整合，是国内集飞行器研发制造、通航业务运营以及通航技术人才开发为一体的新型通航产业集团。

创新方面和主要优势 / Innovative Aspects and Main Advantages/Benefits:

宜航选择了美国亚利桑那州作为公司在美国的飞行基地，可谓独具慧眼。这里地处沙漠，平均每年 365 天中有 300 多天是可目视飞行天气，所以全美的大部分航校集中在这里。而公司更是在这里设立美国总部，对于我们的预备飞行员的学习生活全程管理，除了保证飞行员能够保质保量的完成飞行学习项目以外，飞行员生活中的各种状况也可以让国内的家属及时了解。 It is perspicacious of Easyfly to choose Arizona as its air base in the United States. Surrounded by the desert, the place has more than 300 days of visual flight weather out of the 365 days each year on average. That's why most aviation schools of the whole United States gather here. The company has even established the USA headquarters here for the whole-process management of the study and life of our probationary pilots. In addition to ensuring that the pilots can complete the flying learning programs based on the quality and quantity requirements, family members at home can timely learn about the various conditions of the life of the pilots.

目标市场 / Market Segments:

近年来，中国航空运输市场发展强劲，已跻身全球第二，但通用航空飞行员却跟不上发展，我国在册通用航空飞行员数量不足 4000 人，预计未来 10 年我国对通用航空飞行员的需求量将超过 15000 人。到 2015 年，我国整体飞行员缺口将高达 1.8 万名。

目前发展阶段 / Current Stage of Development:

公司已经获得通航领域的各类相关证照，得到了当地政府的大力支持，积极投身于中国民航业的发展与建设，针对目前国内大量缺乏飞行人才的现状，借鉴全球各国先进的培养模式，创立了一条有通航特有的飞行员培养之路。在航空业人才的培养以及专业飞行技术、飞行理念的开发与应用中取得了卓越的成果。 **The company has obtained various relevant licenses of the navigation field as well as great support from local government. The company is actively engaged in the development and construction of China civil aviation industry and has built a path of pilot cultivation with features of Easyfly in response to the current situation that China is short of flight talents and by drawing lessons from the advanced cultivation modes of countries all over the world. The company has scored outstanding achievements in terms of the cultivation of talents of the aviation industry and the development and application of professional flying techniques and concepts.**

合作伙伴的类型和条件 / Type and Qualification of Co-operation Partner:

飞行培训学校。

Request: 飞行员培养国际合作

拟与欧盟或捷克的民航主管部门就飞行员国际合作培养达成共识和相关一致意见，同时与捷克 FAIR 公司就飞行员培养达成合作，具体包括合作培养、代理、科技转移和技术合作，下一步达成合资合作。 **Easyfly is planning to reach a consensus and an agreement on global pilot training with the civil aviation leading departments of European Union or the Czech Republic. Furthermore, Easyfly has built a partnership on pilot training with _FAIR_ of the Czech Republic, which includes cooperation of pilot training, managing, transferring of technology and technological cooperation and will lead to the founding of a joint venture.**

Wind/solar power was founded in order to produce, distribute and further develop the new VRB-ESS technology during the last couple of years. Our VRB-ESS are tailored for the integration in resp. on WIND/Solar Power Plant - existing and new ones - and for applications, our VRB-ESS would be cheaper and robust. Our first prototype (5kw x 2hr) was installed in Chengdu more than one year ago and has been tested since. Electrolyte, ion exchange membrane, and bi-pole are the key materials for making VRB-ESS. Our electrolyte, membrane, and bi-pole is cheaper and robust also. 最近几年,风能/太阳能发展很快,配上钒电池储能系统后,给风能/太阳能的应用带来很大益处。这就对钒电池的生产和技术发展提出了更多需求。赢创的钒电池可用于风能/太阳能,成本更低,可靠性更好。赢创的5kw x 2hr钒电池原型样机,1年前就在成都制造成功,并测试至今。电解液,离子交换膜,双极板是钒电池的主要功能材料,赢创的电解液/膜/双极板,成本更低,可靠性更好

项目简介

“成都·高新国际低碳环保科技园”位于成都高新区中和片区，绕城高速公路以南、成仁快速路以西，毗邻锦江支流。

项目用地总面积500亩，其中科研用地400亩；综合配套100亩；总投资40亿元。通过先进的管理模式、完善的配套服务、优雅的生活国际化绿色生态园区。

分期开发

根据地块的功能规划布局和分期分区开发理念，项目分为三期开发，每一期引入园中园的概念，从而实现功能交错、每个园区功能

1. 总部办公基地

智能化、低密度、生态型总部办公楼群，为企业提供良好的中枢式运营管理氛围。

2. 研发试制区

为从事研发、试制为主的中小型企业提供便利。

3. 创新创业孵化区

以创新创业为主，为微小企业提供创新创业孵化培育场所和体系。

4. 科技厂房区

提供试制实验室、轻制中试产区、满足研发成果的及时转化。

5. 科技服务区

围绕园区产业链，引入金融、人才、技术、法律、检测、认证、信息等服务公司，搭建相关服务平台，满足入园企业的不同需求。

6. 综合配套区

设立会议中心、金融中心、商务酒店、员工餐厅和公寓、健身娱乐俱乐部等，为入园企业和员工的日常生活所需提供保障。

开篇巨作——彰显卓越品质

一期以“总部办公”“科技服务”“低碳环保”“创业创新孵化”“研发试制”为主题，是低碳环保科技园的开篇巨作，致力于为企业打造

Offer: Mobile Internet Based Interactive HD Video Surveillance Solution

Subscribers are able to watch surveillance camera videos through their mobile phones, tablets and PCs. Also they can control the front-end cameras.

创新方面和主要优势 / Innovative Aspects and Main Advantages/Benefits:

High performance video compression technology which enables high-quality video streams (up to 720p) under limited bandwidth such as GPRS or 3G. Support of main stream mobile phones and tablets including Apple iPhone, SamSung, SONY, Huawei, ZTE, etc.

目标市场 / Market Segments:

Education, Transportation, Energy, Electricity, Real estate, Law Enforcement & Public Safety, etc.

目前发展阶段 / Current Stage of Development:

The solution is very mature and has been widely used in Chinese government, various industries and private companies.

合作伙伴的类型和条件 / Type and Qualification of Co-operation Partner:

System integrators, local distributors and research organizations in video surveillance/transmission technologies and solutions.

Offer: High Definition Video Conferencing System

Our High Definition Video Conferencing System offers users high definition videos (up to 1080p) and interfacing of IP cameras and DVS. Mobile phones and PSTN phones can also be joined in video conferences with the system.

创新方面和主要优势 / Innovative Aspects and Main Advantages/Benefits:

High performance video coding/decoding technologies. Error correction technologies. Embedded-in O/S. Multimedia services integration and processing technologies.

目标市场 / Market Segments:

Government, education, electricity, energy, private companies, etc.

目前发展阶段 / Current Stage of Development:

The system is very mature and has been wide used in local government, industries and private companies.

合作伙伴的类型和条件 / Type and Qualification of Co-operation Partner:

System integrators, local distributors, research organizations specialized in video conferencing areas.

Offer: Kindergarden Interactive Multimedia System

The Kindergarden Interactive Multimedia System provides a solution to enhance the communications between parents and kindergarden administration. It is able to present activities and situations in kindergarden to those who care in real time. Additionally, it offers multiple applications to boost the effectiveness of teaching and learning.

创新方面和主要优势 / Innovative Aspects and Main Advantages/Benefits:

Transmission of high definition videos under limited bandwidth.

目标市场 / Market Segments:

Education.

目前发展阶段 / Current Stage of Development:

The system has been used by more than 100 kindergardens in several provinces in China.

合作伙伴的类型和条件 / Type and Qualification of Co-operation Partner:

System integrators and local distributors who are interested in such solutions.

成都华创生物技术有限公司主要从事创新生物技术药物的研制、开发、申报与转让。公司近期专注在以肿瘤坏死因子相关凋亡诱导配体作为先导分子，对其进行结构突变、定向进化、偶联衍生以及融合表达而得到的新型蛋白候选分子的活性筛选及应用开发，重点发展诱导肿瘤细胞凋亡的靶向生物技术新药及针对肿瘤特异性分子标记的个体化治疗药物、个性化治疗方法。公司同时也重点开发采用CHO等哺乳动物细胞表达的具有高级空间结构和翻译后修饰的复杂结构蛋白质和新型长效蛋白药物，这些药物包括重组长效凋亡素2配体、重组长效卵泡刺激素和重组长效凝血因子VII等。

Chengdu Huachuang Biotechnology Co., Ltd. is mainly engaged in researching, developing, applying and transferring our original biotech drugs. Currently, we focus on screening and developing new protein candidate drugs. TRAIL is the leading protein molecule, and developed into a new protein drug by our efforts on structural mutation, biological evolution, coupling derivative and fusion expression. We specialize in developing targeted biotech new drugs to induce the apoptosis of tumor cells and specific biomarker molecules of certain tumor cells, designing personalized cancer therapy, and pursuing the individualized treatment methods. We are also working on the research in post-translational modifications of complex protein and long-acting protein drugs with advanced space structure by highly efficient expression vectors in mammalian cells, such as CHO. In this field, we have achieved substantive results, including the projects of recombination and long-acting Apo2L, long-acting human follicle stimulating hormone, and coagulation factor VII.

Cooperation Profiles

[Offer: Company hopes to establish relations of cooperation with European companies](#)

The candidate drugs was self-developed and has the advantages in high anti-tumor activity, overcoming drug resistance, and taking effect in new mechanism. Designed and screened by molecular tumor markers, the drugs are used to treat more specific and accurate indications. We hope to establish relations of cooperation with European companies in the area of pre clinical researching, clinical trials and even product launching. Technology transfer is another way of cooperation (Chinese market is not included). We would like to cooperate with European companies in any other ways, such as investment shares more than twenty million euros. 成都华创生物技术有限公司候选药物具有更高的抗肿瘤活性、能克服原有分子的耐药、通过新的作用机制起效。采用肿瘤生物分子标记进行药物设计和筛选，其适应症更为专一和精准。我公司希望与欧洲企业进行项目合作，包括临床前研发、临床实验以及产品上市等合作；针对公司成熟技术进行非中国市场的技术转让；约2000万欧元投资参股及其他任何方式进行合作。

[创新方面和主要优势 / Innovative Aspects and Main Advantages/Benefits:](#)

1、比野生型TRAIL具有更高的生物学活性、更优的药物稳定性、更好的生物利用度，尤其对于耐药性肿瘤具有更强的杀伤活性。2、针对不同肿瘤类型的特殊或耐药性分子标记物，具有治疗靶向明确，作用更加快速直接，药物毒副及不良反应更小的特点。3、采用多靶点组合的作用方式，同时诱导受体途径凋亡信号通路和线粒体途径信号通路，减少继发性耐药

的产生。 1. By comparison with wild-type TRAIL, our products display higher biological activity, better drug stability and bioavailability, and show well performance in anti-tumor effect especially for drug-resistant tumors. 2. The advantages of well-targeted, more direct and fast action, lighter toxicities and adverse effects are ascribe to our strategy of using specific and drug resistance biomolecular markers for different tumors. 3. Using multi-target combination mode of action, inducing extracellular receptor apoptosis signaling pathway and mitochondrial signaling pathways at the same time to reduce the secondary resistance.

目标市场 / Market Segments:

恶性肿瘤是世界性严重公共卫生问题，据国际癌症研究机构公布的数据显示，2008年全球新发肿瘤病例1270万人，死亡人数760万人，肿瘤病例总数超过4500万人。预计到2030年，全球每年新增肿瘤病例2600万人，死亡人数将达1700万人。肿瘤业已取代心血管疾病成为第一大疾病死因。2012年全球抗肿瘤药市场销售已达800亿美元，中国抗肿瘤药物市场规模也超过了500亿人民币。As a serious public health problem in the world, malignant tumor has replaced cardiovascular disease, becoming the first critical disease leading to death. According to the data published by International Agency for Research on Cancer (IARC), in 2008, the world's new cases of tumor are 12,700,000 and the mortality stands at 7,600,000. By the year 2030, the new cases of tumor are expected to 26,000,000 and the deaths will reach 1,700,000. In 2012, the market sales of antitumor medicine have increased to \$80 billion, and in Chinese market, the sales is worth ¥ 50 billion.

目前发展阶段 / Current Stage of Development:

合作伙伴首选抗肿瘤药物的研发、生产企业；希望的合作类型：按照客户需求定向合成、筛选获得新型TRAIL衍生分子；寻求已经初步证明药效的TRAIL衍生分子的技术及产品转让；接受投资进行已选定候选TRAIL衍生分子的联合或共同开发。We are considering developing partnership with enterprises especially in the field of researching and manufacturing anti-tumor drugs. As mentioned, we can provide services and transferring, and we also seek for investors and partners. 技术合作具有创新性的方面以及优点：什么样的问题它能够解更好地解决，或者是能解决什么必须解决的问题1、采用组合生物学的手段和方法，将多种蛋白的有效片段通过特定的连接片段在基因水平进行融合，重组表达，生产具有功能的新型融合蛋白。融合蛋白具有均一、稳定、可控、方便的特性，具有良好的成药性和开发价值。2、将TRAIL进行穿膜肽样突变或在融合蛋白中引入穿膜肽序列，借助于TRAIL与肿瘤细胞表面死亡受体的特异性结合，增强融合蛋白-受体复合物的细胞内吞效应，穿膜肽样TRAIL可直接进入细胞内，改变了药物的亚细胞定位，通过新的作用机理发挥药效。3、将TRAIL作为一种优良抗肿瘤药物载体偶联小分子化学药物、天然产物或淋巴毒素，或靶向抗肿瘤药物，其与抗体作为载体的ADC技术相比具有药物分子量小、穿膜性能好、生物活性更高、生产成本低廉的优点。1. The fundamental and innovative methods: using combinatorial biological methods, fusing several proteins' effective fragments by specific linker fragments in gene level, recombining and expressing, and then producing new functional fusion protein. The fusion proteins have the advantages of homogeneity, stability, controllability and convenience, and the merits of becoming drugs as well as the value for development. 2. Solution: Mutating TRAIL to make it cell-penetrating peptide alike or adding cell-penetrating peptide sequence into fusion protein gene, the swallowing effect of fusion protein-receptor complex is enhanced and the mutant TRAIL can enter the cell directly, all of which attributes to TRAIL's characteristic of specific binding with anti-tumor cell surface death receptors. The mutation would change TRAIL's subcellular localization. Thus, its efficacy could be exerted by a new mechanism. 3. Solution: as an excellent anti-tumor drug carrier, TRAIL can couple with small molecular chemical drugs, natural products or lymphotoxin and targeted anti-tumor drugs. Compared with ADC technology, another technology by using antibody as carrier, the coupling has lighter molecular weight, better transmembrane performance, higher biological activity and lower production cost.

Core businesses include engineering and construction of garden irrigation, modern agricultural water-saving fertilization and landscape fountains as well as comprehensive pond-waterproof engineering.

For irrigation business, we can provide

- 1) Irrigation equipment (including pump station, filter equipment, various kinds of irrigation devices, irrigation control system and other equipment related to irrigation).
- 2) Irrigation design and consulting business.
- 3) Installation of irrigation system.
- 4) On-site technical service related to irrigation system (including installation guide and system commissioning).
- 5) Maintenance of irrigation system (maintenance of irrigation system of golf course and large park).

For landscape fountain, we can provide

- 1) Floating landscape fountain equipment (with lighting system imported from USA)
- 2) Installation and commissioning of floating landscape fountain equipment.

For waterproof, we can provide

- 1) Firestone lining system (new pond waterproof).
- 2) Installation of lining system.

For R&D of electronic product, we can provide

- 1) R&D of new electronic control and test product (development based on functions required by users).
- 2) Our products under R&D include: central control system for irrigation and underground water automatic monitoring system.

以园林灌溉、现代农业节水施肥的设计施工；景观喷泉设计施工、池塘防水综合工程为核心业务。

灌溉业务：我们可以提供

- 2) 灌溉设计和咨询业务。
- 3) 灌溉系统安装。
- 4) 灌溉系统现场技术服务（包括安装指导和系统调试）。
- 5) 灌溉系统维护（高尔夫及大型公园等灌溉系统的维护）。

景观喷泉：我们可以提供

- 1) 浮动式景观喷泉设备（带灯光系统，美国进口）
- 2) 浮动式景观喷泉设备安装调试。

防水材料：我们可以提供

- 1) 凡士通衬垫系统（湖塘防水新材料）。
- 2) 衬垫系统安装。

电子产品研发：我们可以提供

- 1) 新型电子控制和检测产品的研发（按用户功能需要进行开发）。
- 2) 我们正在研发中的产品包括：灌溉控制中控系统、地下水自动监测系统。

Cooperation Profiles

[Offer: Cooperation in oil products and international projects 在石油产品方面以及国际项目的合作](#)

商业合作：可以为合作伙伴提供高性能的石油天然气勘探开发油田化学剂产品。1、固井添加剂：降失水剂、缓凝剂、防窜剂、促凝剂、减阻剂、消泡剂、隔离剂、冲洗剂、减轻剂、加重剂、填充剂、弹塑剂等十余种系列四十多种产品；2、钻井液处理剂：植物润滑剂、植物沥青防塌剂、全效抗磨剂、降滤失剂、堵漏剂等二十多种产品；3、压裂酸化用化学剂：交联剂、支撑剂、杀菌剂、助排剂、清洁压裂液等十多种产品；4、采油助剂：调剖剂；5、防腐产品：缓蚀剂、阻垢剂等。

目标合作伙伴：各油田业主方、钻探公司、油田服务公司等，合作类型可以是直接用户、代理等，合作的国家不限。技术合作：1、超长封固大温差固井水泥浆体系水泥浆在同等稠化时间下具有更短的凝固时间，同等凝固时间下有更高的强度。

在水泥浆封固段的上下部温度相差近100℃下，上部在72小时甚至24小时内具有强度。2、弹塑性固井水泥浆体系在不降低水泥强度的条件下，水泥具备弹性与塑性。减少水泥环因温度、压力变化、射孔振动的破坏引起的与井壁、套管壁胶结变差。满足储气库、页岩气固井对水泥环的韧性要求，保证水泥环的长期密封性，降低油气窜流的风险。3、EFD环境友好型水基/油基钻井液体系EFD环境友好型水基钻井液不使用石油沥青、矿物油等有害成分，主要由抗温抗盐增粘剂、降滤失剂、植物润滑剂、植物沥青防塌剂及抗磨剂组成；油基钻井液外观颜色为灰白色，主要由主乳化剂、辅乳化剂、降滤失剂和润湿剂组成。该体系最大特点是保持钻井液不分散并提高钻速，对环境无毒无害。以上技术或者技术中使用到的产品具有多项国家发明专利，在中石油、中石化多个油气田深井、超深井以及壳牌石油页岩气区块广泛应用。合作时可以提供方案设计、产品供应及现场实施的“一体化”的服务。目标合作伙伴：各油田业主方、钻探公司、油田服务公司等，合作类型可以是直接用户、代理等，合作的国家不限。技术需求：1、废弃油基钻井液处理技术与设备具有搅拌、混合、粉碎、清洗、脱液干燥等功能的集成设备及所需的处理剂，处理量满足钻进过程中油基钻屑随钻处理要求（钻屑处理量3-5

m³/h)。技术指标: 降低废弃油基泥浆、钻屑的含油量, 满足排放要求(含油量低于1%)。废弃油基泥浆处理后只产生合格油基钻井液与泥土。目标市场: 中国页岩气地区及其它使用油基钻井液地区。**2、压裂排出水处理与回收运用技术与设备处理成套设备及所需处理剂。**技术指标: 压裂排出水经处理净化, 满足排放要求, 排出水回收后用于压裂。处理剂要求: 排出水不处理即可配制压裂液。目标市场: 中国页岩气地区。**3、油井压裂酸化用化学剂抗高温压裂、酸化用化学剂与使用技术。**技术指标: 抗温140℃的压裂、酸化用化学剂以及现场运用技术, 要求携砂性良好、极低残留、对储层低伤害、与地层缓速化学反应。目标市场: 中国新疆、四川碳酸岩地层。以上技术和产品的目标合作伙伴: 国外化学公司, 环境公司, 油田服务公司等; 合作类型为购买、代理或成立联合体共同为油田提供产品和服务。

创新方面和主要优势 / Innovative Aspects and Main Advantages/Benefits:

商业合作: 可以为合作伙伴提供高性能的石油天然气勘探开发用油田化学剂产品。**1、固井添加剂:** 降失水剂、缓凝剂、防窜剂、促凝剂、减阻剂、消泡剂、隔离剂、冲洗剂、减轻剂、加重剂、填充剂、弹塑剂等十余种系列四十多种产品;**2、钻井液处理剂:** 植物润滑剂、植物沥青防塌剂、全效抗磨剂、降滤失剂、堵漏剂等二十多种产品;**3、压裂酸化用化学剂:** 交联剂、支撑剂、杀菌剂、助排剂、清洁压裂液等十多种产品;**4、采油助剂:** 调剖剂;**5、防腐产品:** 缓蚀剂、阻垢剂等。目标合作伙伴: 各油田业主方、钻探公司、油田服务公司等, 合作类型可以是直接用户、代理等, 合作的国家不限。技术合作:**1、超长封固大温差固井水泥浆体系水泥浆在同等稠化时间下具有更短的凝固时间, 同等候凝时间下有更高的强度。**在水泥浆封固段的上下部温度相差近100℃下, 上部在72小时甚至24小时内具有强度。**2、弹塑性固井水泥浆体系在不降低水泥强度的条件下, 水泥具备弹性与塑性。**减少水泥环因温度、压力变化、射孔振动的破坏引起的与井壁、套管壁胶结变差。满足储气库、页岩气固井对水泥环的韧性要求, 保证水泥环的长期密封性, 降低油气窜流的风险。**3、EFD环境友好型水基/油基钻井液体系EFD环境友好型水基钻井液不使用石油沥青、矿物油等有害成分, 主要由抗温抗盐增粘剂、降滤失剂、植物润滑剂、植物沥青防塌剂及抗磨剂组成; 油基钻井液外观颜色为灰白色, 主要由主乳化剂、辅乳化剂、降滤失剂和润湿剂组成。**该体系最大特点是保持钻井液不分散并提高钻速, 对环境无毒无害。以上技术或者技术中使用到的产品具有多项国家发明专利, 在中石油、中石化多个油气田深井、超深井以及壳牌石油页岩气区块广泛应用。合作时可以提供方案设计、产品供应及现场实施的“一体化”的服务。目标合作伙伴: 各油田业主方、钻探公司、油田服务公司等, 合作类型可以是直接用户、代理等, 合作的国家不限。技术需求:**1、废弃油基钻井液处理技术与设备具有搅拌、混合、粉碎、清洗、脱液干燥等功能的集成设备及所需的处理剂, 处理量满足钻进过程中油基钻屑随钻处理要求(钻屑处理量3-5 m³/h)。**技术指标: 降低废弃油基泥浆、钻屑的含油量, 满足排放要求(含油量低于1%)。废弃油基泥浆处理后只产生合格油基钻井液与泥土。目标市场: 中国页岩气地区及其它使用油基钻井液地区。**2、压裂排出水处理与回收运用技术与设备处理成套设备及所需处理剂。**技术指标: 压裂排出水经处理净化, 满足排放要求, 排出水回收后用于压裂。处理剂要求: 排出水不处理即可配制压裂液。目标市场: 中国页岩气地区。**3、油井压裂酸化用化学剂抗高温压裂、酸化用化学剂与使用技术。**技术指标: 抗温140℃的压裂、酸化用化学剂以及现场运用技术, 要求携砂性良好、极低残留、对储层低伤害、与地层缓速化学反应。目标市场: 中国新疆、四川碳酸岩地层。以上技术和产品的目标合作伙伴: 国外化学公司, 环境公司, 油田服务公司等; 合作类型为购买、代理或成立联合体共同为油田提供产品和服务。**Business Cooperation: 1. Additives for well cementation: over ten series and forty kinds of products such as fluid loss agent, retarder, blocking chemical, coagulant, drag reducer, defoamer, separant, cleaning agent, lightening admixture, weighting agent, filling agent and elasticizer. 2. Drilling fluid additives: over twenty kinds of products such as vegetable lubricant, vegetable pitch anti-collapse agent, ensemble antiwear agent, filtrate reducer and bridging particle. 3. Chemicals for fracturing and acidizing: over ten kinds of products such as cross-linking agent, proppant, bactericide, cleanup additive and clean fracturing fluid. 4. Additive for oil extraction: profile control agent; 5. Anti-corrosion products: corrosion inhibitor, anti-sludging agent, etc. Target partners: the Owner, drilling company, oilfield service company, etc. of each oil field; type of cooperation can be the direct cooperation with the user or the agent, etc.; there is no limit for cooperation country. Technical Cooperation: 1. Cement slurry system with super-long sealing and great temperature difference for well cementation The cement slurry has shorter setting time in the same thickening time and higher strength in the same WOC time. The difference between temperatures of upper and lower parts in the sealing section of cement slurry is nearly 100℃, and the upper part has strength within 72 h or even 24h. 2. Elastic-plastic cement slurry system for well cementation Under the condition that the strength of set cement will not be reduced, it is elastic and plastic. Reduce weakening of cementation between the cement sheath and well wall or casing wall due to variation in temperature and pressure as well as damage to perforation vibration. Meet the requirements of gas storage and shale gas cemented well for toughness of cement sheath, ensure long-term leakproofness of cement sheath, and reduce the risk of oil-gas channeling. 3. EFD environmentally friendly water-base/oil-base drilling fluid system Free of hazardous ingredients such as petroleum asphalt and mineral oil, the EFD environmentally friendly water-base drilling fluid is mainly composed of tackifier with heat and salinity tolerance, filtrate reducer, vegetable lubricant, vegetable pitch anti-collapse agent and antiwear agent. The oil-base drilling fluid is in grey white and mainly composed of main emulgator, auxiliary emulgator, filtrate reducer and wetting agent. The leading feature of the system is: it can protect the drilling fluid from dispersion and increase the drilling speed, and it has no toxicity and harm to the environment. The abovementioned technologies or products used in which has multiple national patents for invention, which are widely applied in multiple deep wells and super-deep wells of oil and gas fields of CNPC and Sinopec as well as shale gas section of Shell Oil Company. In cooperation, integrated service of project design, product supply and field conduct can be provided. Target partners: the Owner, drilling company, oilfield service company, etc. of each oil field; type of cooperation can be the direct cooperation with the user or the agent, etc.; there is no limit for cooperation country. Technical Demand: 1. Technologies and equipment for disposing waste oil-base drilling fluid In-**

egrated equipment with functions such as stirring, mixing, smashing, cleaning, exhaustion of fluid and drying as well as required disposal agents; the disposal capacity meets the immediate treatment requirements for oil-base drillings during drilling (the treatment capacity of drillings is 3-5 m³/h). Technical indicator: reduce the oil content in waste oil-base mud and drillings, which shall meet the discharging requirement (the oil content is less than 1%). Only qualified oil-base drilling fluid and soil are produced after the waste oil-base mud is treated. Target market: shale gas areas in China and other areas where oil-base drilling fluid is used. 2. Technologies and equipment used for treatment and recycling of discharged fluid during fracturing Complete equipment for treatment and required treating agents Technical indicator: the discharged fluid during fracturing achieves the discharging requirements upon treatment and purification, which is used for fracturing after recycling. Requirement for treating agent: the discharged fluid can be used for preparing fracturing fluid without treatment. Target market: shale gas areas in China. 3. Chemicals for fracturing and acidizing of oil well Chemicals for high temperature resistant fracturing and acidizing as well as applied technologies. Technical indicator: the chemicals for high temperature (140°C) resistant fracturing and acidizing as well as applied technologies are required to have good sand-carrying capacity, very low residue, low harm to reservoir stratum and slow chemical reaction with stratum. Target market: carbonatite stratum in Xinjiang and Sichuan of China. Target partners for the abovementioned technologies and products: foreign chemical companies, environment companies, oilfield service companies, etc.; the type of cooperation is to supply products and services to oil fields by means of buying, agency or establishing a consortium.

1、抗高温油井水泥缓凝剂国家发明专利产品，密度范围：1.30-2.80g/cm³；使用温度范围：40-210°C；可以调试出可泵送时间超过5小时的固井水泥浆，候凝24小时具有16MPa以上强度。已在中国国内应用了100井次以上。2、超长封固大温差固井水泥浆体系密度范围1.30-2.80g/cm³，温度范围80-140°C，可调试出满足固井施工需要的性能，配套有满足相应要求的隔离液体系。可实现1.30-2.50g/cm³大于6000m段长的一次性封固。3、弹塑性固井水泥浆体系水泥浆形成的水泥石具有弹性与塑性。水泥石弹性模量可降低到2GPa。在井下高温高压条件下应力应变超过5%。4、EFD环境友好型水基/油基钻井液体系EFD环境友好型水基钻井液最高使用温度180°C、抗盐10%以上。实际使用最大井深6850m、最高井底温度170°C、密度1.70g/cm³，钻速提高10%以上。油基钻井液最高使用温度220°C、密度2.70 g/cm³。

1. High temperature resistant oil well cement retarder It is a national invention patent product with density range of 1.30-2.80g/cm³ and operating temperature range of 40-210°C. It can be used to prepare cement slurry for well cementation with pumping time over five hours, WOC time of 24h and strength over 16MPa. It has been applied in over 100 wells in China. 2. Cement slurry system with super-long sealing and great temperature difference for well cementation It is with density range of 1.30-2.80g/cm³ and temperature range of 80-140°C. It can be adjusted to meet the performance requirements for well cementation, and is provided with spacer fluid system that meets related requirements. It can realize one-time sealing with density range of 1.30-2.50g/cm³ for section with length over 6000m. 3. Elastic-plastic cement slurry system for well cementation The set cement formed from cement slurry is elastic and plastic. The elasticity modulus of set cement can be reduced to 2GPa. In high-temperature and high-pressure conditions at the well bottom, the stress-strain is over 5%. 4. EFD environmentally friendly water-base/oil-base drilling fluid system The EFD environmentally friendly water-base drilling fluid is with maximum operating temperature of 180°C and salinity tolerance over 10%. In actual application, the maximum well depth is 6850m, the highest well bottom temperature is 170°C, the density is 1.70g/cm³, and the drilling speed is increased by over 10%. The oil-base drilling fluid is with maximum operating temperature of 220°C and density of 2.70 g/cm³.

公司专注于固体颗粒物与气体两相超高效率分离设备（装备）的研发和制造，分离后气体含尘量达到0.05-1mg/Nm³量级；已获得2项发明专利和13项实用新型专利，还有超过6项发明专利进入实审阶段。

核心技术人员积累了超过十年的工业烟气净化和高附加值固体颗粒物回收工艺装备的设计/制造/运行经验。

采用创新技术和工艺为用户创造持久价值，是公司发展的核心理念；智能化，网络化和免维护是公司制造设备的统一标准。

公司开发的全球第一台 瑞柯林® “三超”离心式空压机空滤器，已高效运行9个月，超用户期望。

在工业领域，对空气“超净”过滤的成功经验，也为在民生领域，营造无PM_{2.5}污染的洁净人居环境空间，提供了全新、可靠/可信赖的解决方案。

公司与美国戈尔，奥本系统公司建立了长期战略合作关系，这两家在各自领域处于全球领先技术的公司，为公司自有知识产权的系列“超净”系统技术解决方案提供了全面支持；同时公司在欧洲寻求该领域的高技术公司合作，丰富公司的技术手段和经验。

目前部分核心元件正在与德国公司合作，定制并进口到中国成为公司专利设备的一部分。

产品或服务范围（注明英文名称）；研发或生产使用的先进设施、设备；通过何种国际认证；主要进/出口对象国；主要进/出口产品（注明英文名称）；对外合作经验等。

We are committed to the R&D and manufacturing of solid particles and gas two-phase ultra high efficient separation equipment (device). After separation, the dust load of gas can reach 0.05-1mg/Nm³. We have achieved two patents for invention and 13 utility model patents, as well as more than six patents for invention under substantive examination.

The core technicians have accumulated more than ten-year experience in industrial flue gas purification and design, manufacturing and operation of technological equipment for recycling solid particles with high added value.

The core concept of our development is to utilize innovative technology and process to create long-lasting value for clients. The unified standard for manufacturing equipment is intelligence, networking and free of maintenance.

Our successful experience in ultra-clean air filtration in the industrial area has provided a new, reliable and trustworthy solution for creating clean living environment free from PM_{2.5} in the field of people's livelihood.

We have established long-term strategic cooperation relationship with American companies—W. L. Gore & Associates, Inc. and Auburn Systems, LLC., both of which are the global leading companies in their respective area, providing comprehensive support for ultra-clean system technology solutions under self-owned intellectual property rights.

Moreover, we are looking for European high-tech companies to cooperate in this area, so as to enrich our technological means and experience.

At present, by cooperating with the German company, we have customized and imported some core components, making them to be part of our proprietary equipment.

Chengdu Shuke Technology Co., Ltd. is a high-tech enterprise mainly engaged in localization of imported equipment in electric power and chemical industry and concurrently involved in non-standard design and manufacturing of mechanical equipment; we have created our self-owned brand based on localization and R&D of imported high-end equipment, which is a senior enterprise in localization and development of spare parts of electric power, chemical industry and other industries. We pay close attention to the new headway of domestic industrial equipment and the latest design ideas and concepts of world-famous brands. Based on years of localization researches, we accumulated strong technical strength in terms of product structure design and material selection, and equipped with advanced production processes and equipment. Adhering to the cultural core of "technology is the soul", we gather the company's top-notch talents in all professional areas in Technology Research and Development Department, employ domestic leading experts as technical advisers, maintain scientific payoffs and technological exchanges with many research institutions at home and abroad, and keep up with domestic and foreign technical updates. We have successively completed the valve sealing mechanism, properties hard sealing auxiliary material, cladding welding process and other several technical researches, which helped to maintain our domestic leader position in relevant technical fields. We launched high-powered valve products with anti-cavitation, washing-out resistance. Adopting self-developed materials and processes, we exceed the international ANST B16.104-1976V standard in leakage control over valve, which helps our customers to improve operational efficiency, save energy consumption, and reduce cost. Through years of painstaking researches and usage in actual working conditions, we have gotten outstanding performance and won widespread praises. Currently, we have established long-term and stable cooperative relations with Huaneng Power International, Inc., China Huadian Corporation, China Datang Corporation and other large state-owned power generation groups and Yunnan Zhanyi Fertilizer Plant, Liuzhou Chemical Industry Co., Ltd. and other chemical enterprises, and accumulated a wealth of experience and well performance with respect to transformation of imported equipment and localization development.

成都市蜀科科技有限责任公司业务以电力、化工行业引进进口设备的国产化为主体，兼机械设备的非标设计制造的高技术企业，公司立足于进口高端设备的国产化研发领域，创立自主品牌，是国内电力、化工等行业备件国产化开发的资深企业。公司密切关注国内工业设备的发展动态和世界著名品牌的最新设计思路及理念，经过多年的国产化研究，公司在产品的结构设计和材料研究选型方面拥有雄厚的技术力量，并配备了先进的生产工艺和设备。公司以“科技为魂”作为文化核心，技术研发部汇集公司各专业领域拔尖人才，聘请国内相关领域的权威专家为技术顾问，与国内外多家科研机构保持科研成果技术交流，紧跟国内外技术更新。先后完成了阀门密封机理探究、硬质密封副材料性能研究和覆层式焊接工艺等多项技术内容的研制工作，保持了公司在相关技术领域的国内领跑者地位。推出具有抗汽蚀、耐冲刷的高性能泵阀类产品，采用自主研发的材料和工艺，在阀门的泄漏量控制方面，超过国际上的ANST B16.104-1976V标准，为公司客户提高了运行效率、节约能耗、减低成本。经过多年的潜心研究和实际工况使用，公司业绩斐然，赢得了广泛好评。目前公司与华能国际、华电、大唐等大型国有发电集团和云沾化、柳化等化工企业建立了长期稳固的合作关系，在进口设备改造及国产化研制方面积累了丰富的经验和良好的业绩。

成都天立化工科技有限公司成立于1999年，现有职工475余人，注册资金3752万元，资产35,500万元。一直以来公司致力于从事节能环保变压吸附气体分离技术的研究和开发，目前已开辟出多个应用领域，大幅提高了有效气体(如H₂、CO、CO₂、N₂和CH₄等)的回收率，有效降低了公用工程消耗，甚至在脱碳领域取消了人类所公认不可能取消的动力设备，使变压吸附气体分离这一新兴技术不仅只使用在废气回收等小型装置上，在大型工业装置上也得到快速推广，为绿色环保的变压吸附气体分离技术带来了广阔的发展前景。公司已自主研发出26项高新技术，其中16项获得国家发明专利，3项获得国际发明专利。

Chengdu Tianli Chemical Engineering Technology Co., Ltd. which was established in 1999, has more than 475 employees, with a registered capital RMB37.52 million, total assets up to RMB355 million. Our company specializes in the research and development of pressure swing adsorption (PSA) technology for gas separation, which saves energy and protects environment. Until now we have opened up a number of application domains, we have brought a great improvement on the effective gas recovery(such as H₂, CO, N₂, CH₄), successfully cuts down utility consumption, and even cancels power equipments which are regarded as absolutely necessary in the decarburization field. Therefore, PSA as a kind of new isolation technique is not only applied to packaged units of waste gas recycling, but also be widely applied to many large scale industrial units, which bring a bright developing future to the environmental friendly PSA technology.

Chengdu Weijing Waterproof Material Research Institute, one of domestic private scientific and technological enterprises in the early days, was identified as a high-tech enterprise in 1996 and specializes in researching new building waterproofing materials and relatively difficult waterproof construction technology. It plays a leading role in fine chemical field in China. Since 1990s, the Institute has successively undertaken the research of many state-level scientific and technological projects and subjects such as state-level new products, National Key Scientific and Technological Project during the "9th Five-Year Plan" Period and National Torch Program, and been honored with provincial and municipal scientific and technological advance (achievement) awards by virtue of its several achievements in scientific research. Wherein, some new waterproof construction technologies e.g.: the leaking stoppage with quick-drying waterproof coating and the expansion joint waterproofing work have been recorded in *China's Technological Achievements* and Local Construction Technical Requirements and Specifications and are recommended nationwide by National Building Materials Bureau. Its "Development of High-grade 2, 5-Dimethyl-2, 5-di (tert-butylperoxy)-3-hexyne" Project has been obtained the support of 2006 Fund Program for Chengdu Small and Medium-sized S&T Enterprises. In 1995, the Company and Japan Geophysics Incorporated Company and Xicunxiji co-established Chengdu Weijing Xiwang Fine Chemical Industrial Co., Ltd., which has the registered capital of RMB12 million and specializes in producing high-tech and patented products researched and developed by Chengdu Weijing Waterproof Material Research Institute such as DBPH, DHBP, Double-2, 5, 101, 130 DYBP, di-tert-butyl peroxide (DTBP, initiator A), tert-butyl hydroperoxide (TBHP) and organic intermediate 2, 5-DHAD, etc.

成都惟精防水材料研究所系国内早期民营科技企业之一，1996认定为高新技术企业，专业从事新型建筑防水材料和难度较大的防水施工技术研究。在精细化工领域处于国内领先地位。本所自九十年代起，先后承担国家级新产品、国家“九五”重点科技攻关项目、国家级火炬计划项目等多项国家级科技项目课题研究，有多项科研成果获省、市科技进步（成果）奖。其中快干型防水涂料堵漏、建筑伸缩缝防水处理等防水施工新技术，被载入《中国技术成果大全》和地方施工技术规范，并经国家建材局向全国推荐。其“高品位2, 5-二甲基-2, 5-二叔丁基过氧基-3-己炔的研制”项目获得2006年成都市科技型中小企业技术创新基金项目支持。于1995年与日本国地球物理株式会社、西村喜继合资建立成都惟精喜望精细化工有限公司，注册资金1200万元人民币，专业生产成都惟精防水材料研究所研制的高新技术与专利产品高品位双二五（DBPH、DHBP、双-2,5、101）、130（DYBP）、过氧化二叔丁基（DTBP、引发剂A）、叔丁基过氧化氢（TBHP）与有机中间体2,5-二甲基己二醇（DHAD）等。

Focused on providing low cost, long range, ultra low power wireless data connection and remote control products (firmware and hardware) for wide range of application areas, based on most advanced LDSW technology today (which has been accepted by ISO as the technical basis for a new international standard and with 18 patents involved). For ITS, logistics, LBS, smart home and smart agriculture, indoor location, automatic metering, assets tracking, etc. It will create great opportunities for all the integrators because of the big data collected via LDSW. We are looking for partners working with us for long term mutual benefit relationship

公司专注于向客户提供基于当今世界上最先进的，已被ISO国际标准化组织接受为新国际标准技术的LDSW技术，开发出的低成本、超低功耗、超远距离的物联网智能终端数据采集产品，用于传感器数据采集和传输，以及低功耗无线远程控制（产品包括底层硬件和软件）。LDSW可广泛用于智能交通、物流、智慧家庭、智慧农业、三表集抄、资产人员跟踪等应用，它将为各行各业的软件系统集成商提供大数据采集的基本手段，从而为软件系统集成商带来无比巨大的机会。

[Offer: A new generation of smart wireless technology for wide range of IoT applications](#)

A new generation of low cost, ultra low power & long range (>1500m) active RFID system which has multi-functions of identification, RTLS, sensor data collection and wireless remote control . It has been accepted by ISO as the technical basis, for a new ISO-18000-4(4). It has a wide range of IoT applications: lindoor & outdoors location & tracking for cars, assets in ware house ,patients in hospital, seniors in nursing home. workers ; real time traffic flow data connection in cities for triffic jam fee auto connection and ITS; Smart home for safty, emergency communication without mobile net coverage, remote sensor data collection via UAV. Wireless remote control via LDSW smart phone,..... We provide hard ware & firm ware with API and on line support for users to develop their own application software. We would like to buikld a long term world wide partnership in flexible ways.

创新方面和主要优势 / Innovative Aspects and Main Advantages/Benefits:

A new smart wireless communication technology of LDSW. LDSW works at very low duty cycle and multi-communication channel cooperation working mode. With "DNA check "wake up technology, a wireless smart terminal module or active RFID tag 1500 m away can be fast woken up and consuming only very little power of 8 uA average. LDSW will solved almost all the problems of IoT data collection & device control at very low cost, ultra low power & in a very flexible ways. With LDSW ,

目标市场 / Market Segments:

IoT applications in Europe and the world wide market ,

目前发展阶段 / Current Stage of Development:

From verious pilot applications entering mass production for wide range of large scale applications Working with system integrators to develop application softwares in differen fields. Developing LDSW mobile pophone

合作伙伴的类型和条件 / Type and Qualification of Co-operation Partner:

System integrators already have clients in some fields, and willing to provide more products and service to their clients by using LDSW IoT technology. Partners in different ways Distributors, New products developers willing to using new lot technology Handset manufacturers Investors

公司成立于2005年9月，是一家从检验、检疫合格的鲜动物皮（牛皮、驴皮、猪皮）中提取生物低抗原性活性胶原（I型）的高科技生物技术公司。

公司拥有一支由博士、硕士、工程师、大学本科等多层次技术人员组成的强有力的技术队伍，经几年的努力，成功的开发了一种驴皮胶原的制备方法，并获得了专利（专利号：ZL201010176321.9），同时我们也创新了配套设备（实用新型专利号：200920304729.2）；利用科学的检测手段将（专利号：ZL201010176321.9）和（专利号：ZL200410040487.2）、（实用新型专利号：200920304729.2）经过小试、中试成功的生产出组织诱导生物医学材料中间体——生物低抗原性活性胶原（I型）。产品为白色丝状物，不透明，无支链（即无端肽），具有生物活性、低抗原性、与人体皮肤的同源性、相容性、水溶性及可降解性等优良特性，经权威部门检测，此产品的理化指标、微生物指标、生物学性能指标均合格，可用来开发外科手术植入物、医学试剂、功能性口服液、功能性护肤用品等。2009年11月11日，四川省科技厅组织专家在成都对我公司研制开发的“生物低抗原性活性胶原（I型）制备技术”项目进行了科技成果鉴定。专家鉴定意见为：技术创新性强，先进可行，国内领先，具有良好的经济效益和社会效益。鉴定委员会一致同意通过技术鉴定（科技成果登记号：2009Y0516）（企业标准号：Q/78010185-6.01-2012）。

The company was founded in 2005 September, is a from the inspection, quarantine qualified fresh animal leather (leather, donkey skin, pigskin) extracting biological low antigenicity of active collagen (type I) in Biotech Corp.

The company has formed a by Dr., master, engineer, bachelor's degree, multi-level technical staff a strong technical team, after several years of efforts, preparation method of the successful development of a donkey hide collagen, and obtained a patent (Patent No.: ZL201010176321.9), at the same time, we also created equipment (the utility model patent No.: 200920304729.2); using the scientific means of detection will (Patent No.: ZL201010176321.9) and (Patent No.: ZL200410040487.2), (Patent No.: 200920304729.2) through laboratory, pilot work to produce tissue inducing bio-medical materials intermediates -- biological low antigenicity of active collagen (type I). Products are white silk, opaque, unbranched (i.e. no peptide), with biological activity, low antigenicity, and human skin homology, compatibility, can be excellent characteristics of degradation and so on, by the authoritative department detection, this product physical and chemical indicators, microbial indicators, biological performance indicators are qualified, can be used to the development of surgical operation implants, medical kit, functional oral liquid, functional skin care products etc.. In November 11, 2009, Sichuan Provincial Department of science and technology experts in Chengdu on biological activity of low antigenicity of collagen our company developed "(I) preparation technology" project of scientific and technological achievements identification. Expert opinion: technology innovation and strong, advanced and feasible, the leading domestic, with good economic and social benefits. Identification of the committee unanimously agreed passed technical appraisal (scientific and technological achievements registration number: 2009Y0516) (Enterprise Standard No.: Q/78010185-6.01-2012).

Diabetic gangrene including the pathological changes of great vessels and capillary blood vessels, the pathological change, injury and infection of peripheral nerves and autonomic nerves, is the serious pathological change of diabetic foot, and is the result of the integrative pathological change of diabetes mellitus. In recent years, as the disease rate of diabetes mellitus is increasing, the disease rate of diabetic gangrene is also increasing. Moreover, the course of disease is long, the cure rate is low, the amputation rate is high and the cost is big, resulting the negative influences on the diabetes patients and their families. We hope to negotiate or constitute a joint venture in cooperation with the European companies who are interested in the Low-antigenic Bioactive Collagen (Type I) or are specialized in venture capital management. By applying the Intermediate of Tissue Inducing Biomaterials, i.e., the natural biological macromolecular Low-antigenic Bioactive Collagen (Type I) as raw materials, the water-soluble hydrogel can be prepared using our matured technology. The hydrogel product is bioactive, low-antigenic, water-soluble and biodegradable, and has homology and compatibility to human skin, remaining the good properties of the Low-antigenic Bioactive Collagen (Type I). As proved by experiments, the water-soluble hydrogel (for external use) has specially good effects when it is applied to the therapy of diabetes mellitus and diabetic dermopathy.

Chofn IP was founded in 2002. It has grown into one of China's leading full-service IP firms, with offices in Beijing, Chengdu, Hangzhou, Shenzhen, Chongqing, Changsha and Guangzhou. More offices are being opened in other major Chinese cities. Our team is composed of experienced IP practitioners, including attorneys, engineers, advisors and consultants in all technical areas.

With over 11 years of experience, we have provided services to over 30,000 clients in more than 100,000 trademark filings in China. Chofn's clients come from various industries, including leaders in high-profile industries. We are committed to providing our clients with prompt and practical solutions. Such solutions might include the prosecution, enforcement, litigation, management and consultancy relating to trademark, patent, copyright, and domain name. Our policy is to insist on prompt and practical services and we aspire to make greater contributions to the success of our clients worldwide.

Chofn has been named the Chinese Trademark Agency of Excellence by the China Trademark Association. Chofn has been listed by the World Trademark Review in WTR 1000 for the year 2013 and received high praise—"Extremely reliable for prosecution"; Chofn Intellectual Property is rapidly expanding its profile. Its crowning achievement to date has been edging into the high-volume filings space..., while retaining "excellent service levels and proactivity to smooth the way through the trademark registration process". Anti-counterfeiting is another Chofn forte, with a robust approach to dealing with pirating: "yielding results" and demonstrating "great strength".

Mianyang Opera & Dance Drama Theater jointly with Mianyang Art School has successively visited more than 20 countries and regions and won international gold awards for several times during international dance contests, winning a big honor for the country! It was honored with a title of 'Advanced Unit for Cultural Exchange with Foreign Countries' by Sichuan Provincial People's Government. In June 2010, Wen Jiabao, Premier of the State Council, had a cordial meeting with our actors in Zhongnanhai Tower of Violet Light. Mianyang Opera & Dance Drama Theater has also made an outstanding contribution to the development of national cultural undertakings by participating in a series of major artistic performance activities such as National Farmer Games, National Sports Festival of China and Sichuan Art Festival of Minorities. Currently, we are building a classic work that can represent Chinese excellent traditional culture—*Man-Snake Love*, a large-scale dance drama showing Chinese stage unique skills and techniques.

绵阳市歌剧舞剧院携手绵阳市艺术学校先后出访了20余个国家和地区，在国际舞蹈大赛上多次荣获国际金奖，为国家争得荣誉！被省政府授予对外文化交流先进单位称号。2010年6月，国务院总理温家宝在中南海紫光阁亲切接见我院演员。绵阳市歌剧舞剧院参加了全国农运会、全国体育大会、四川省少数民族艺术节等一系列重大的文艺演出活动，为国家文化事业的发展做出了突出贡献。目前正在打造一部能代表中国优秀传统文化的经典作品。这是一台展示中国舞台绝技、绝活的大型舞剧——《人蛇恋》。

四川三叶草生物制药公司是由留美学子、世界著名分子生物学家、发明家、企业家及四川省首位生物医药“千人计划”创业人才入选者梁朋博士于2007年在他的家乡四川成都创办的一家高新企业，注册资金5000万人民币。公司拥有目前世界上最先进的“AP-TAG”受体检测及抗体/受体药物筛选技术和“蛋白质三聚体化”生物制药技术平台，正致力于用该技术研发生产抗体、受体类最新蛋白质工程药物，该类现代生物靶向制药目前在世界上的市场每年已超过1500亿美金（1万亿人民币），并以20%增长速度逐年递增。

公司坐落于美丽的成都高新技术南区孵化园内，拥有先进的无血清高密度哺乳动物细胞培养、蛋白质药物分离纯化及制备的中试生产车间，和世界一流的质检及分子生物学实验室。梁朋博不仅带回了他在美国已授权的十几项专利(其中包括欧洲、日本及中国的PCT专利技术)，还带回了大量资金，同时整合了现代生物制药的尖端技术人才团队回国创业。目前我公司已聚集了四位中组部“千人计划”入选者，为四川省生物医药领域中千人计划入选者最多的高新企业。三叶草团队获得了2009年国务院侨办颁发的“重点华侨华人创业团队”称号，并入选2012年成都市首批顶尖团队。公司在人才引进、关键技术、基础建设及抗体/受体创新药研发及产业化方面在国内及世界的领先地位，获得了3项国家十二五“重大新药创制”科技重大专项及“抗体药物关键技术”国家863计划的立项支持和认可，并受到地方政府，包括成都高新区、成都市和四川省的重点扶持。

公司团队精诚团结，以世界领先的AP-TAG及蛋白质三聚体化技术为依托，进行着近十项现代生物逻辑制药品种的研发和生产，在研创新药物针对的疾病为当今人类健康的主要危害及杀手，其中包括内风湿关节炎、银屑病（牛皮癣）、癌症、心血管疾病、艾滋病等，具有良好的市场潜景与发展空间。

Clover Biopharmaceuticals is the world leader in protein trimerization technology for modern biologic drug designs. With an initial registered capital investment of 50 million RMB and the support of the Chengdu government, the company is situated within the beautiful campus of the Chengdu Hi-tech Business Park.

Our patented human TRIMER-TAG protein-engineering platform allows any protein, such as a therapeutic antibody, a soluble receptor or an immunogen, to be made as a secreted protein completely in trimeric form. The resulting trivalent biologic drugs are much more efficient in either targeting their naturally occurring homo-trimeric ligands, such as TNF-alpha family of cytokines and HIV gp120 coat protein; or being a effective vaccine. Together with our patent Differential Display and AP-TAG technologies, Clover Biopharmaceuticals is also well positioned in upstream capabilities for drug target identification and drug screening.

Founded by Dr. Peng Liang, a world-renowned molecular biologist and proliferate inventor, Clover Biopharmaceuticals is the first Chinese biotech company with the largest single investment from a returning Chinese American student. With an assembly of world-class scientists in protein engineering and bioprocess development, we intend to bring the most sophisticated modern biologic wonder drugs at an affordable price to millions of Chinese patients with debilitating diseases such as arthritis, psoriasis, cancer and AIDS.

四川东林矿山运输机械有限公司是专业从事散状物料输送成套设备研发、制造及销售的装备制造企业。公司从事矿山运输机械设备制造已有三十多年历史，是中国重机协会带式输送机分会理事单位、国家起重运输机械行业中的重点企业、中国重型机械工业协会先进单位，获得省级“科学技术进步奖”、四川名牌产品“东林牌”等荣誉称号。公司产值和销量全国行业综合实力排名前茅。公司的生产规模、技术实力、厂区规模属西部最具竞争力、最具影响力、最具潜力、最具代表性的输送设备制造企业。公司拥有一座省级技术中心，研发人员共32人，配备了完善计算机设计系统及相关性能测试、实验系统，公司技术中心已成为西南地区散状物料输送设备的研发基地。公司目前已成为西部生产散状物料输送设备的一面旗帜，东林机械与中国华电集团、中国国电集团、国网能源集团、中国大唐集团、德胜集团等100多家国内大中型企业建立了长期稳定的供需关系。

Sichuan DONGLIN Mine Transport Machinery Co. Ltd. is an equipment manufacturer specialized in research & development, manufacture and sales of complete equipment for delivery bulk material. The Company has been engaged in manufacturing transport equipment for over 30 years. As a director unit of Belt-type Conveyor Sub-association of China Heavy-duty Machinery Industry Association, a key enterprise in the Hoisting and Conveying Machinery of China and an advanced unit of China Heavy-duty Machinery Industry Association, our Company has been awarded “Prize for Progress in Science and Technology” and Sichuan Famous “DONGLIN” brand. The production value, sales volume and comprehensive strength of our Company are among the best in the industry across the country. The production scale, technical strength and factory scale of our Company belong to the most competitive, most powerful, most potential and most representative transport equipment manufacturer. Our Company has a provincial technical center, owning 32 researchers in total, provided with complete computer design systems and related performance testing and experimenting systems. The technical center has become a research & development base of transport equipment for bulk material in Southwest China. DONGLIN Machinery Co., Ltd. has become a flag of manufacturing transport equipment for bulk material in Southwest China, and has established a long-term stable supplier-customer relationship with over 100 large and medium-sized domestic enterprises such as China Huadian Corporation, China Guodian Corporation, State Grid Energy Development Co., Ltd., China Datang Corporation and Desheng Group.

公司主要生产铸钢件、铸铁件，单件重量达10吨。年生产能力30000吨；拥有V法生产线一条，其它生产工艺设备若干；用于产品质量控制检验的主要设备有：光谱仪、超探、磁探、拉力试验机、低温冲击机等。近年来，相继与美国、伊朗、澳洲等客户达成意向性合作协议，其中澳洲客户MULTOTEC公司已与我公司正式签章。

始终坚持以主机和维修市场同时并举为经营策略，按照国际先进的营销管理理念，大力实施科技主导与品牌战略，以质量求生存，追求质量完美。内部形成了全员参与、分级管理、责任分明、统一协调的组织管理体系。公司拥有自主品牌，产品销售渠道和网络已覆盖了全国二十多个省、市（自治区），并与多家主机厂配套，并在2012年被评为四川省著名商标。

The Company mainly produces steel casting, iron casting, with the weight of a single piece up to 10 tons. Its annual production capacity is 30,000 tons. It owns a V method production line, a number of other production process equipment. The major equipment for quality control inspection include: Spectrometer, ultra-probe, magnetic probe, tensile testing machine, low temperature impact tester. In recent years, the Company have reached an intentional cooperation agreement with customers from the United States, Iran, and Australia, in particular, MULTOTEC from Australia has officially signed contract with our Company.

The company keeps the operation and management faith of "people-oriented, seeking truth and innovation, building brand and making good quality, customer supreme, operating with integrity, and seeking common development". We always adhere to the co-development of host and maintenance market as our operating strategy and vigorously implement the technology-led and brand strategies in accordance with international advanced marketing management concept to achieve the quality of survival and to pursue perfect quality. An interior organization management system of whole staff participation, management at different levels, clear responsibility and consistent development is formed. The company has its own brand. Its sales channels and networks of products have covered more than twenty provinces, municipalities (autonomous regions), supporting with several host companies, and it was appraised as a famous brand of Sichuan Province in 2012.

Offer: Cooperation on New Energy 合作意向

四川能投是四川省人民政府批准组建的省级产业性投资公司，是四川推进能源基础设施建设、加快重大能源项目建设的重要主体。四川能投在能源产业上坚持“做强电网、做大电源、做实燃气、开发新能源”的发展战略，在做实做优存量资产的同时，不断开拓新的项目，已形成一大批优质项目。

创新方面和主要优势 / Innovative Aspects and Main Advantages/Benefits:

电网方面，通过资产重组，收购兼并地方电力公司26家，逐步建立川南、川东北、青川平武三个地方配电网，供电人口占四川全省总人口的21%。水电方面，控股开发总装机56万千瓦的金沙水电站已于2012年底启动开工建设。参股金沙江下游向家坝、溪洛渡、白鹤滩、乌东德四个巨型水电站，获得权益装机容量约700万千瓦。风力发电方面，盐边大面山风电场（46MW）获得核准；会东拉马、鲁南风电场已开工建设，获美姑、雷波测风权，预计到2020年底风电总装机约200万千瓦左右。生物质能方面，投资3.5亿元的自贡市垃圾发电项目已投产发电，四川广安、射洪、康定和广西玉林等垃圾环保发电项目正加快推进。天然气方面，与中石化组建了四川省天然气投资有限责任公司，目前相关的输气管道、城市及交通燃气等具体项目正加紧推进。煤层气方面，作为四川省战略性新兴产业之一，积极开展我省川南地区煤层气勘探开发，目前正在推进泸州石宝煤层气项目钻探试验。页岩气方面，作为四川省战略性新兴产业之一，与中石油等共建“四川长宁天然气开发有限责任公司”，正在开发宜宾长宁区块页岩气，并将逐步加快开发我省其它地区页岩气。分布式能源方面，四川第一个分布式能源项目得到核准，多个分布式能源项目正有序推进。金融服务方面，组建了金鼎产融，业务覆盖投资、小额贷款、融资担保、保险代理、融资租赁、商业保理、典当、拍卖、新能源基金等领域，着力打造全牌照金融服务平台。 Power grid, through asset restructuring, mergers and acquisitions of local power company 26, the gradual establishment of southern Sichuan, Northeast Sichuan, Aokawa Hirata three local distribution network, power supply population of Sichuan Province 21% of the total population. Hydropower development, holding assembly Jinsha hydropower machine 560000 kilowatts station has been at the end of 2012 to start construction. Shares of the lower reaches of the Jinsha River Xiangjiaba, Xiluodu, Bai Hetan, Wudongde four giant hydropower station, obtain equity installed capacity of 7000000 kw. Wind power, Yanbian large surface wind farm (46MW) approved; Lu, Huidong pullersouth wind electric field has started construction, won the Leibo Meigu, windpower is expected by the end of 2020, total installed capacity of wind power is about 2000000 kw. Biomass energy, investment of 350000000 yuan Zigong city garbage power gen-

eration project has been put into operation in Guang'an, Sichuan, Shehong, Kangding and Guangxi Yulin environment friendly garbage power generation projects are speeding up the. Natural gas and natural gas, Sinopec set up Sichuan Province investment limited liability company, at present the related gas pipeline and gas, city traffic specific project is stepping up. Coal seam gas, Sichuan Province as one of the strategic emerging industries, and actively carry out my province in the exploration and development of coalbed gas in southern area, is currently promoting the drilling test Shi Luzhou CBM project. Shale gas, as one of the strategic emerging industry in Sichuan Province, to build a "and PetroChina Changning Sichuan natural gas development limited liability company", is being developed by Yibin Changning block of shale gas, and will gradually speed up the development of shale gas in other areas of my. Distributed energy, Sichuan first distributed energy projects approved, multiple distributed energy projects is orderly. Financial services, formed the Jinding industry financial, business covers investment, small loans, financing guarantee, insurance agency, financial leasing, factoring, commercial pawn, auction, new energy fund and other fields, and strive to create a full licence financial service platform.

Request: Resource reclamation and reduction in coal-consumption--desulfurization and denitration 资源回收利用节煤--脱硫脱硝法

介绍：资源回收利用节煤脱硫技术是一种将固体废物回收利用和电厂脱硫技术有机结合的技术，是将炉内节煤脱硫与炉外应用冲渣水烟气脱硫方式二者有机结合起来新型节煤脱硫技术。其节煤脱硫剂由污泥（生活垃圾、泥煤等）或煤矸石、石灰石、氧化镁、碳酸钠、氧化铝、高分子催化剂、助燃剂等10余种原料组成。由于生活垃圾、污水处理厂污泥（有害工业废水污泥除外）、农村沼泽以及湖泊清淤的污泥及煤矸石有一定热量，其每公斤发热量大致在1500-4000大卡之间。在锅炉中添加燃烧时能替代一部分煤炭，添加剂中的石灰石等物质可以在锅炉内与SO₂反应，达到回收废物节煤脱硫的目的。同时，其添加剂中的碱性成分随煤质灰渣落入灰渣池，其碱性成分溶解于循环冲渣水中，再利用冲渣水对烟气进行脱硫，达到国际脱硫标准。 创新方面和主要优势：技术的新颖性、领先性和独特性：节能脱硫循环法（燃煤节能脱硫剂“以煤净煤”产品）：一. 节能脱硫循环法工艺（燃煤节能脱硫剂国家发明专利产品）应用，可以同时使燃煤节能，脱硫，消黑烟，除尘，污水治理，一体化互助环保治理四达标排放。二. 节能脱硫循环法的应用、推广将是国际脱硫市场的一场革新，将会优化淘汰和更新现在所有的脱硫方案、工艺。三. 生活垃圾的再生利用，脱硫与生活垃圾的处理均是世界难题，在脱硫达标的同时，大量燃烧生活垃圾将替代燃煤。在当今煤炭资源越来越紧张，生活垃圾的再生利用，将是未来的一个革命性发展方向。 技术规格：（只需求方填写） 目标市场：火电、冶金、建材等耗能企业；本脱硫项目较传统脱硫项目成本降低50%，不管是否有脱硫装置，均可采用，市场巨大，不可估量 目前发展阶段：该技术已有三项发明专利。2010年，国家总理温家宝批示，发改委指定由最具权威的西安热工院测试，中国环境科学学会在北京主持召开了“资源回收利用节煤脱硫法”成果鉴定会。 结论：以处理后的生活垃圾和干化污泥为主，再辅以多种添加物所组成的节煤脱

硫剂，实现炉内节煤脱硫，然后以碱性冲渣水为介质，对烟气中的二氧化硫进行炉后脱硫，这是一项新的以废治废节煤脱硫集成技术，技术路线合理，具有创新性，脱硫效率95%以上，节煤达8%左右，该技术已达到国内领先水平。目前是推广应用阶段。 合作伙伴的类型和条件：有资金、有资源、有推广能力的企业。

Sichuan Fusi Surface Technology Co., Ltd. is a modern enterprise specialized in researching, developing and manufacturing a variety of filter products, equipment and mechanical parts as well as researching and developing new technology and new products for surface treatment of textiles. The production technology of filters is introduced from Michigan Dynamics, Inc. of America; the technology and equipment for surface ceramic treatment of aluminum alloy parts are introduced from domestic famous colleges; and the technology and equipment for production of painting and calligraphy grass cloth are researched and developed independently by Sichuan Fusi Surface Technology Co., Ltd. (owning independent intellectual property and has declared the invention patent and the utility model patent).

In November 2012, Sichuan Fusi Surface Technology Co., Ltd. was awarded the National Hi-tech Enterprise Certification (GR201251000014). In addition to products such as HV & LV melt cartridges, air (nitrogen) cartridges, oil (water) filter devices, air rectifiers, hydrogen filters and automatic backwashing systems, other strainers of chemical fiber fore-spinning components, edged screens, washers, high-strength bolts and springs for special purposes have formed series. Sichuan Fusi Surface Technology Co., Ltd. is also qualified for manufacturing precise filter devices, with the coal gas filter as a key technical innovation project in Sichuan in 2012.

Our Company already has 18 patents, 13 of which have been certificated, 1 is in process and 4 are under examination and approval. Our Company has a well-established quality management system, passed the ISO9000 Certification in 2010.

四川福斯表面技术有限公司是专业从事各类过滤产品、设备以及机械零件、纺织品表面技术处理的新技术、新产品研制生产的现代化企业。本公司的过滤器生产技术系从美国 (Michigan Dynamics, Inc.) 引进; 铝合金零件表面陶瓷化技术和设备与国内知名高校引进; 书画夏布生产线技术和设备由本公司研制生产 (拥有自主知识产权, 已经申报发明和实用新型专利)。

2012年11月, 四川福斯获得国家高新技术企业认证 (GR201251000014), 产品除熔体高、低压滤芯、空气 (氮气) 滤芯、油 (水) 过滤装置、空气整流器、氢气过滤器、自动反冲系统为主外, 其它化纤前纺组件滤网片、包边网、垫圈、高强螺钉、特殊用途的弹簧等也已形成系列, 并拥有生产精密过滤装置的能力, 其中, 煤气过滤器为2102年四川省重点技术创新项目。

我公司目前已拥有18项专利, 其中13项已有证书, 1项正在受理, 4项正在审批中。公司有完善的质量管理体系, 2010年获ISO9000认证证书。

Sichuan Jiangyou Kunpeng Cultural Media Co., Ltd. is located in the hometown of Li Bai (a famous poet in Tang Dynasty) –Pink Bamboo House at Qinglian Town, Jiangyou County, which is cultural enterprise integrating tourism product R&D, design, production and sales as well as Sichuan embroidery training. Adhering to the business philosophy of “carrying forward Li Bai culture and inheriting Sichuan embroidery skills”, we are determined to develop our non-material cultural heritage - Sichuan embroidery, and strive to build a Sichuan embroidery production base with local cultural characteristics.

Our “Li Bai’s poetic embroidery product” series are one of most distinctive Sichuan embroidery products in Jiangyou area and the most creative tourism products at Li Bai’s hometown. Themed Li Bai’s poetic paintings, these products are manually woven by many superior embroidery artisans. They are featured by smooth velvet, delicate stitch, deep and mellow embroidery rhyme, vivid picture that thoroughly represent the artistic conception in Li Bai’s poems. Currently, we have developed four major categories of handmade products covering clothes, bag, accessories and home furnishing articles, which not only enriched the connotation of the brand and increased the product varieties, but also grant new vitality to the ancient Sichuan embroidery.

Motivated by a desire of promoting traditional skills and serving people of our hometown based on the local characteristics, we prefer to the business model of “free training, flexible employment and product buyback” to conduct embroidery trainings especially for unemployed community residents, handicapped persons, stay-at-home and land-lost women. At present, we have developed various cultural tourism projects such as the travel to Qinglian Town, Sichuan embroidery works show, embroidery women’s live show, visitor’s embroidery experience, exhibitions on works of China Artists Association, and centralized Sichuan embroidery trainings. Our “Li Bai’s poetic embroidery product” series have been well-reputed at the national urban tourism product exhibitions, and have been awarded the “Best Craft” of the community group at the Sichuan 1st “Mother Arts” Handcraft Product Competition and the title of “Top 10 Distinctive Tourist Products in Mianyang City”, etc. We look forward to integrating the “Li Bai’s poetic embroidery” Sichuan embroidery cultural industry and China’s Sichuan embroidery skills with European traditional cultural elements to create new manifestation ways, and show China’s traditional skill to the world and build a bridge for cultural exchange between China and Europe.

四川省江油坤朋文化传媒有限公司位于李白故里青莲粉竹楼，是一家集旅游产品研发、设计、生产、销售和蜀绣培训为一体的文化企业。公司秉承“弘扬李白文化，传承蜀绣技艺”的经营理念，以发展非物质文化遗产——蜀绣为己任，努力打造具有地方文化特色的蜀绣生产基地。

该公司旗下“李白诗意绣”品牌系列产品，以李白诗意画为刺绣题材，汇集技艺高超之绣工手工织就而成，其绣品绒片平滑、针脚细腻，绣韵浑厚圆润、灵动秀雅，诗情画意跃然织绵之上，是江油地区最具特色的蜀绣产品之一，亦是李白故里最佳创意之旅游产品。目前，公司相继开发了服装、包具、饰品、家居等四大品类的手工产品，既丰富了品牌内涵，增加了产品种类，又使古老蜀绣焕发出勃勃生机。

公司本着立足地方特色、推广传统技艺、服务家乡人民的思想，采取“免费培训、灵活就业、产品回购”的经营模式，专门针对社区无业居民，残障人士，留守和失地妇女进行刺绣技艺培训。现公司已形成青莲古镇旅游、蜀绣作品展示、绣娘现场表演、游客刺绣体验、美协作品展览、蜀绣集中培训等特色文化旅游项目。“李白诗意绣”系列产品，在全国城市旅游产品展览会上多次获得业界好评，并获得四川省第一届“母亲艺术”手工作品大赛社区组“最佳工艺奖”，绵阳市十佳特色旅游产品等称号。公司被江油市妇联指定为“妇女就业基地”，也被江油市政府列为特色旅游产品生产基地。“李白诗意绣”蜀绣文化产业，可以融合中欧文化，将欧洲传统文化元素，与中国的蜀绣技艺结合起来，创新蜀绣的表现方式，也将古老的中国传统技艺展示给世界，为中欧文化交流架起沟通的桥梁。

The factory covers an area of more than 80,000 square meters, with more than 300 employees.

Strength is always derived from brand. Suncao Group is founded basing on the integrated strength of Suncao Lighting brand accumulated on outdoor lighting since 2001 when the first company established. So far, our products sale network has covered more than 41 large-medium cities in China, and also exported to more than ten countries of Asia, Europe and America. During the past 13 years, Suncao Lighting brand does not only get the approval from industry peers and customers, but also gets lot of honors awarded by some guilds and administrative organizations of government, such as:

In 2007, Suncao Lighting Brand was awarded as “Top Brand” by Lighting Association of Guangdong Province;

In 2008, our products won awards on “Excellent Outdoor Lighting Product” during the “China Lighting Products Event for 2008”, held by China Association of Lighting Industry

In 2008, with the invitation from Bureau of Quality and Technical Supervision of Guangdong Province, we participated in drafting on “Products Standard for Solar Street Lamp of Guangdong Province”.

Basing on our accumulation on products R&D, the ground established the second production base in Zigong city in 2008, Sichuan Jincan Photoelectric Co., Ltd, and expanded the products into the indoor lighting market further. So far, Suncao Lighting has developed to an integrated lighting servicer in China, with professional R&D team on indoor and outdoor lighting products, scale production base, completed distribution net together.

金鑫照明集团是一家综合照明集团，由东莞金鑫照明技术有限公司、四川金灿光电有限责任公司和四川奥明节能服务有限公司三家独立公司组成。作为一家中国照明企业，金鑫集团主要从事城市景观、道路和场馆照明，以及LED系列产品的设计、生产和销售。公司的生产基地现位于中国成渝经济区腹地——自贡市。厂房占地面积逾80,000平方米，员工超过300人。

实力始终源于品牌。金鑫集团的实力则源于金鑫照明品牌。自2001年成立第一家公司以来，金鑫照明品牌在户外照明上集聚了强大的综合实力。目前，我们的产品销售网络已覆盖中国41个大中城市，并且产品还向亚洲、欧洲和美洲的十多个国家出口。

凭借在产品研发方面的经验积累，集团于2008年在自贡市建立了第二个生产基地——四川金灿光电有限责任公司，并将产品范围进一步扩大至室内照明。目前，金鑫照明集团已发展成为中国一家综合照明服务商，拥有专业的室内和户外照明产品研发团队、规模生产基地和全套分销网络。

Offer: Digital TV system

The system contains the browser, the Java virtual machine, Javascript application, network access adapter, a variety of media format decoding and so on a number of core technologies.

创新方面和主要优势 / Innovative Aspects and Main Advantages/Benefits:

①Company is the largest domestic digital TV equipment manufacturers and triple play system solutions provider; ② Company has formed a digital TV front end, network transmission, terminal and digital optical components business such as layout; ③in the next generation networks (NGB), network television (IPTV), intelligent set-top boxes, transmission network, home multimedia center, Internet business has formed the key products.

目标市场 / Market Segments:

Digital television and triple play areas

目前发展阶段 / Current Stage of Development:

Complete product development

Offer: LED

Including LED semiconductor indoor and outdoor and landscape lighting products series, LED display series and LED semiconductor devices .

创新方面和主要优势 / Innovative Aspects and Main Advantages/Benefits:

①Company products cover chip, encapsulation device, display application, road lighting and landscape lighting and indoor whole series; ②Products meet the national green environmental protection, energy conservation and emissions reduction macro policy requirements; ③Products obtained CCC, TUV, CE, RoHs, UL, FCC, CB certification.

目标市场 / Market Segments:

The public lighting market 、 Industry lighting market and The subway, the airport, submarines and other special lighting market.

目前发展阶段 / Current Stage of Development:

公司始创于2008年，先后在江苏的沛县、江西的兴国县建厂试产，2011年的烟气排放指标以部分超过欧洲标准，2012年取得了2项国家专利。2014年3月公司迁至成都，开始“生活垃圾窑式自燃、资源再生”技术的市场推广、深层次的研发及市场运营。

Sichuan LiangXin Environmental Technology Co., Ltd. was built in 2008. We build factories for testing at Peixian county, in Jiangsu Province and Xingguo county, in Jiangxi Province. Part of the flue gas emission targets are better than the European standard in 2011, and we obtained two national patents in 2012. In March 2014 the company moved to Chengdu high-tech district. Conduct a comprehensive "Garbage kiln spontaneous combustion, renewable resources" technology marketing, in-depth research and market operations.

[Request: Looking for technical collaboration in recycling economic and industrial chain 寻求循环经济产业链的技术合作](#)

城市生活垃圾窑式自燃，循环经济产业链的技术合作/推广 Garbage kiln spontaneous combustion, Technical cooperation/promotion of circular economy industrial chain

[创新方面和主要优势 / Innovative Aspects and Main Advantages/Benefits:](#)

项目名称：建立以生活垃圾为依托的循环经济产业链 Project Name: Establish a recyclable economic industrial chain that based on raw garbage 技术支撑：生活垃圾窑式自燃、资源再生 Technical support: Garbage kiln spontaneous combustion, renewable resources. 技术层次：公司专利，国内首创，世界唯一 Technical level: Company patents, Domestic initiative, The world's technology level.

[技术规格 / Technical Specifications:](#)

1、项目简介：利用生活垃圾产生的气体，对发酵好的垃圾在窑中以无明火的方式助燃，实现垃圾焚烧过程中能源自给自足，使生活垃圾快速转换成优质焦渣，进行资源再生。 1、Project introduction: Using the gas that come from raw garbage, to help the fermentation of the garbage combustion in the kiln. Achieve energy self-sufficiency in garbage incineration process, so it converts garbage into high-quality coke residue quickly and make renewable resources. 2、工艺及技术简介 Process and Technology 2、1 分拣工段：使用地下全密闭结构，进行破袋、风选、磁选、金属探测、人工分选，收集垃圾产生的气体，将废塑料、橡胶、金属、棉织物、可燃物、电池等分拣归类。 Sorting section: We use an underground fully enclosed structure, break bags, air separation, magnetic separation, metal detection, manual sorting, collecting the gas generated from the garbage. Then it is sorted into classifications of waste plastics, rubber,

metal, cotton, fuel and batteries. 2、2发酵工段：采取地下全密闭发酵工艺，提高垃圾热值，回收垃圾渗透液及垃圾产生的气体。 Fermentation section: We use underground fully enclosed fermentation process, to improve the calorific value of garbage recycling permeate and gas . 2、3窑式自燃工段：将发酵的垃圾一次性装入窑内，利用垃圾产生的气体进行助燃，窑内中心温度可达1250--1500度，产生的焦渣含硅量约占50%，气孔丰富、质轻、粘结度高、渗水性好，用其制造出的建材具隔音、保温等特点。 Kiln spontaneous combustion section: The fermented garbage is loaded in a kiln, then use garbage generated gas for the combustion .The Kiln center temperature can reach 1250--1500 degrees. The cinder silicon content is about 50%, which is very porous, lightweight, It can produce building material with sound insulation, heat preservation, high bond and water permeability. 2、4烟气处理工段：经过处理后，三分之二的气体回窑助燃，剩余三分之一的气体，采用现代湿法，结合螺旋洗烟、卧式活性炭吸附等工艺，洁净达标排放。 Flue gas treatment section: After treatment, two-thirds of the gases go back to the kiln to help combustion, and another one-third of the gases will be cleaned by modern liquid methods. We combined this with spiral smoke wash, horizontal active carbon adsorption process, such as clean emissions standards. 2、5污水处理工段：垃圾渗透液经过特殊处理后，利用约1500摄氏度的待出炉焦渣为介质，对其进行喷淋、气化灭菌、消毒处理，同时把焦渣温度降到室温执行出炉。 Sewage Section: Garbage permeated liquid after it goes through special processing, use of about 1500 degrees Celsius coke residue as medium, spray it, gasification and sterilization, then disinfect it. At the same time reduce the cinder temperature to room temperature to out.

目标市场 / Market Segments:

合作方向：向发展中国家、发达国家提供城市生活垃圾处理和循环经济方面的技术合作，运营支持及整体解决方案 The direction of cooperation: For developing countries and developed countries to provide urban garbage disposal and recycling economic technical cooperation, operational support and overall solutions

目前发展阶段 / Current Stage of Development:

3、主要循环经济产品The products of circular economy 柴油：由橡胶、次等废弃塑料产生。 Diesel: produced by rubber, inferior waste plastic. 植物焦炭：由棉织物、可燃物、植物秸秆产生。 Plant coke: produced by cotton fabric, fuel, plant straw. 活动板材、装饰板材系列：由焦渣产生。 decorative plate series: produced by cinder. 4、项目特点： Characteristics of the project: 4、1投资少，本项目和相同减量化的垃圾发电项目相比，投资额相当于垃圾发电项目的五分之一。 Less investment, this project compared with the same reduction garbage power generation projects, investment equivalent to one fifth of its. 4、2建设周期短，一般从开工到投产只需6个月。 The construction period is short. Generally only 6 months from start until full production. 4、3节约能源，整个焚烧过程实现了热能的自给自足。 It saves energy. The whole burning process is to achieve thermal energy self-sufficiency. 4、4垃圾减量化速度快，窑炉可根据垃圾的处理量设计制造，增减自如，标准焚烧窑可一次性处理垃圾5千至一万吨，处理周期为5个工作日。 Garbage reduction speed is quick. Kiln can be designed and manufactured according to the capacity of the waste. The standard burning kiln can disposed of the rubbish, from 5,000 tons to 10,000 tons, in a processing cycle of 5 working days. 4、5资源再生程度高，本方案资源循环率约达99.9%。真正实现了垃圾减量为零、排放无害。 High efficiency renewable resources. This scheme resources circulation rate is about 99.9%. Truly realized zero waste reduction and harmless emissions. 4、6经济效益好，成本回收周期不大于3年。经济效益虽好，但社会效益、环境效益是经济效益无法比拟的！ Good economic returns. The cost recovery period is shorter than three years. The economic efficiency is good, but the social and environmental benefits and economic benefits are unmatched! 5、生活垃圾是环境污染的重要来源，城市人口密度快速递增，环境建设是一个世界性难题。为创建健康的人居环境，为造福子孙后代，让我们携手共创美好家园。 MSW is an important source of environmental pollution. Urban population density is increasing fast. Environmental pollution is a worldwide problem. To create a healthy living environment, for the benefit of future generations, let us join hands in creating a better earth.

合作伙伴的类型和条件 / Type and Qualification of Co-operation Partner:

1、项目建设地长居人口不低于20万或日生活垃圾处理不低于200吨。 Not less than 200 thousand people or not less than 200 tons garbage disposal to reside in project construction. 2、政治稳定，社会和谐。 political stability, social harmony. 3、民风淳朴、经济活跃。 The people are simple and honest, economically active. 4、面向国家、地方政府、专业城市垃圾处理企业开展生活垃圾处理及循环经济技术的合作。 For the State, local governments, professional urban waste disposal enterprises to carry out technical cooperation of garbage disposal and recycling economy technology.

Sichuan Songhualing Agricultural Development Co., Ltd. was established in April 2012 to specialize in comprehensive development of lily cultivation, breeding and industry. We has achieved the integration of “agriculture, culture, tourism, industry, learning and research”, the transformation of tourism elements from “eating, living, traveling, sightseeing, purchase and recreation” to “business, health, learning, leisure, affection and wonder” and the import of industrial chain, value chain and other modern industrial organization modes into agriculture, by utilizing scientific planning and design from seedball cultivation to a coordinated process of planting, processing and selling and then to ecological tourism, leisure and recreation, catering service, commercial wholesale and retail, sci-tech exhibition, academic exchange and self-cultivation. We have also promoted integration and interaction of primary industry, secondary industry and tertiary industry and formed “the 6th industry”. Based on full green food standards, our company produces products including “Songhualing ” series lily seedball, edible fresh lily, lily powder, dried lily flower, lily drinks, lily wine, etc. We trace the whole course of cultivation and planting, design plants based on transparent standards, provide clear visible production process, act as a sunshine responsible company, and produce green and safe food.

Our project has formed an industrial pattern of “agriculture, culture and tourism” integrated and harmonious development by standing on lily industrial comprehensive development and gathering lily culture and tourism. At present, it has rapidly developed to domestic largest flowering bulb and seedball base and the world’s third largest flowering bulb and seedball base, as well as China’s only modern agricultural industrialization science & technology demonstration park for independent cultivation and R&D of gene seedballs from lily origin.

At earlier stage, our company has passed green food certification and officially registered its Songhualing trademark. In June 2015, it was awarded with title of “Lily Park” by the Ministry of Forestry. We have established “China-Netherlands Lily Research Institute” with the Netherlands. In addition, we cooperate with the Netherlands about further storage and fresh-keeping of lily products.

四川省松花岭农业开发有限公司于2012年4月成立。专业从事百合培育、繁育与产业的全方位发展。公司通过科学规划设计，从种球培育到种植、加工、销售一条龙，再到生态观光、休闲娱乐、餐饮服务、商业批零、科技展览、学术交流、修身养性，完成“农、文、旅、产、学、研”一体化，完成“吃、住、行、游、购、娱”到“商、养、学、闲、情、奇”旅游要素转变，完成把产业链、价值链等现代产业组织方式引入农业，促进一、二、三产业融合互动，形成“第六产业”。公司产品生产全绿色食品标准生产，产品包括了“松花岭”牌系列百合种球、食用鲜百合、百合粉、百合干花、百合饮料、百合酒等，培育、种植过程全程追踪，透明标准化厂房设计，生产过程清晰可见，做阳光责任企业，产绿色安全食品。

项目立足于百合花产业综合开发，汇集百合文化与旅游，形成以“农、文、旅”一体化融合发展的产业格局。目前迅猛发展为全国第一大、世界第三大的球根花卉种球基地，国内唯一一家具有自主百合原产地基因种球培育、研发的现代农业产业化科技型示范园。

Western is High-tech Enterprises of Sichuan Province, manufacturing as Technologies leads the China in the design and fabrication of permanent magnets and highly specialized magnetic assemblies, manufacturing Samarium Cobalt (Sm-Co) magnet, Samarium Cobalt (SmCo) powder, Samarium Cobalt (SmCo) Bonded magnet and all kinds of magnetic assemblies.

Western currently has reached an annual output of 300 tons of SmCo permanent magnets and 100,000 sets of permanent magnet motor, magnetism-driven parts and modules. Products are widely applied in motor, radar, aerospace, communications, IT peripherals, automatic control, magnetic drive, magnetic separation, medical equipment, instrumentation, automotive electronics, sensor and other high-tech fields, mainly exported to America, Europe, Taiwan and South Korea. Western carry out ISO9001:2008 and ISO/TS 16949:2009 international quality guarantee system wholly.

我司是稀土永磁材料、磁性器件、组件的研发、生产与综合服务的高新技术企业，主要生产SmCo烧结磁体、SmCo磁粉、SmCo粘接磁体，目前达到年产SmCo永磁体300吨、永磁电机、磁力驱动零部件及组件10万套的生产能力。应用于电机、雷达、航空航天、通讯、IT外设、自动控制、磁力传动、磁分离、医疗设备、仪器仪表、汽车电器、传感器等高科技领域，主要出口美国、欧洲、台湾、韩国等国家和地区。全面推行ISO9001:2008；ISO/TS16949:2009质量管理体系，注重环境保护和职业健康。

Z & Z Optoelectronic Co., Ltd was established in Aug.2001. It is specialized in producing super precision optic components, developing special photo electronic devices and systems. It main products includes infrared & laser high precision optics, Plane Laser Induced Fluorescence (PLIF) Detectors, ultra-infrared vehicle night vision system, etc.. Its products are broadly applicable in the fields of space, airplane, military, biomedical and industry.

贝瑞光电科技股份有限公司成立于2001年8月，专业从事超精密光学元器件、特种光电探测仪器和系统的研发和生产，主导产品和研发项目有：红外与激光超精密光学元器件，高速平面激光诱导荧光成像诊断仪、远红外汽车夜视系统等。产品主要应用于航空航天、国防军工、安全、生物医疗、工业等领域。

二、贝瑞的产品:

Z & Z is the one of the several companies in the world which can achieve surface roughness less the 0.1nm for super precision optic components. Z & Z has its extraordinary abilities of manufacture and service to meet customers need in the field of optic components.

1、贝瑞光电是当今国际上极少数能研制生产表面粗糙度小于0.1nm的超精密光学元件的领先性高技术企业之一。公司在超精密光学元件制造领域拥有卓越的技术研发制造能力和服务体系。

Z & Z in implementing “10Hz Plane Laser Induced Fluorescence (PLIF)Detector”, and the technology will be in the leading level of the world. Z & Z’s thermal imaging security system is used broadly in airports, harbors ,oil fields etc.

2、贝瑞光电正研制10KHz 高速平面激光诱导荧光（Plane Laser Induced Fluorescence, PLIF）成像诊断仪”，产品将达到国际尖端水平；贝瑞光电研制的红外热成像安防系统广泛应用于机场、港口、油田等重要部门。

Z & Z has been supplying its high precision and super polishing infrared and laser optic components to quite some world leading companies in optical field like Coherent,Trumpf, Balzers Optics, Flir Systems, JDS Uniphase. And Z & Z wish to extend its cooperation with European customers.

Z & Z wish to communicate with relevant customers which are interested in thermal imaging security systems.

贝瑞光电长期向Coherent、Trumpf、Balzers Optics、Flir Systems、JDS Uniphase等世界光电领域的领袖企业生产和提供超精密红外与激光元件，希望扩展超精密光学领域高端客户的合作。

贝瑞光电希望就红外热成像安防系统、高速平面激光诱导荧光成像诊断仪（PLIF）等相关的技术与产品同欧洲相关领域感兴趣的客户进行交流，探讨可能的合作。
