Contact

Name	RAFAEL SORIANO
Role	DIRECTION

Description

Eficen is an independent Advanced Energy Services Engineering company whose objective is to provide the Client with a profitable platform for project management within the area of Smart Cities and Municipal Energy Management, making available Innovative products and services linked to Business Intelligence and fostering new business models based around energy. Using technological development and the inclusion of new activities, we aim to permanently satisfy our Clients' needs. We develop and manage projects in the area of Smart Cities and Energy Management:

- AUDIT: Optimization of energy costs and reduced emissions.
- ENERGY: Use of natural resources. Bioenergetic analysis capacity of large spaces.
- LIGHTIN: Intelligent lighting management. Maintenance and control energy facilities.
- BUSINESS INTELLIGENCE: Management, maintenance and control energy facilities.

Areas of Activity

- Data Analysis
- Mobile Apps
- Renewable Energy & Sustainability
- Energy Harvesting Devices
- Human Interfaces
- Application Software
- Testing & Analysis
- ICT & Telecom
- Gateways / Communication devices
- Wireless Modules
- Energy

Type of partnership considered

Technical cooperation agreement

Certifications

There are various methods linked to energy measurement and management. Eficen proposes technological improvements, analysing their feasibility and profitability, guaranteeing energy savings and compliance with the standards by undertaking:

- Energy qualifications in Projects and construction through a simulation of the building project obtaining the energy qualification.
- Performing energy audits complying with the requirements established in UNE 216501, energy management system implementation Certificate, within the framework of a commitment to an improvement in efficiency.
- Planning, implementing and verifying the energy system in the industry as per EN UNE 16001, upon AENOR certification, for the implementation of the standard.

Valuable information

Since the beginning of its activity, Eficen Research has considered R & D projects as a basic pillar of its technological development, aware of the importance of offering innovative products in a market where competition is growing. One of the most important projects in which it has participated to date is listed below:

UPTHERM (FP7-605826): "Innovative high efficiency phase change fluid-based heat engine".

The main objective of the project is the development of a regenerative heat converter that uses dense fluids, and is presented as a simple and economical alternative to the thermal engine that works with a power greater than MW. When used as an external combustion engine, the converter is prepared to use heat of any grade and origin (from fossil combustion heat or biofuels to solar energy or ORC engines). Different safe and environmentally friendly fluids such as water or carbon dioxide can be used in the engine, which stands out for being very silent.

In addition to Eficen, the other companies that make up the project consortium are:

- TEP Energy Solution (Italy)
- Encontech BV (Holland)
- Noon Energy (Spain)
- Alenco (Belgium)
- Universidad de Twente (Holland)
- Labor (Italy)
- Imperial (UK)

JIG Digital

Company

Country	Spain
City	Logroño
Street	C/ Piqueras nº 24
Web	http://internet.jig.es

Contact

Name	Ignacio Gurría
Role	CEO

Description

J.I.G. Internet Consulting, hereafter JIG, provides intelligent digital solutions aimed to improve the interoperability and integration of internet-based information systems. Since 2012, JIG has been developing a modular and scalable application oriented to city councils which want to offer their citizens a hub of APPs that integrates all services related to the smart city concept. SmartAppCity has been recognized with numerous national and international awards that stand for its high innovative level. First pilots are now running in several cities of Spain, Mexico and USA. A product architecture based on microservices, and the use of high-innovation technologies, that offers an agile, efficient and scalable solution suited for all sizes of municipalities with any level of maturity in the smart city arena. The system can be used for small villages with no previous smart city infrastructure to medium size and large cities with existing smart city infrastructure. Both ends of the client span will benefit from a 65% reduction of implementation costs (efficiency), a 70% reduction of implementation time (agility) and a x10 faster addition of new services (scalability). With the new SmartAppCity after this project, new smart city services could be added in a matter of hours (from 10 days to a 1-day time-to-market).

Valuable information

Since our foundation, until today we have been growing in services and developing different products, in line with the evolution of technology and our clients' business challenges. We rely on our talent and expertise, as well as on different partners that complement our value chain. This has allowed us to successfully apply artificial vision solutions, deep learning, machine learning, and data science in different projects such as digitization, automation, or brand tracking using computer vision.

Since we started we have received several awards:

Premios Emprendedor XXI – La Rioja – septiembre de 2016 iniciativa impulsada por "la Caixa".
Organizado por ADER. Co-otorgados por el Ministerio de Economía, Industria y Competitividad a través de la Empresa Nacional de Innovación, S.A. (ENISA) en España.

Premio Mejor Emprendedor 2017 de la Cátedra de Emprendedores de La Universidad – mayo de 2017.
Organizado por EmprandeRioja, Gobierno de la Rioja, Federación de empresas Riojanas, ADER y la Cámara de Comercio de la Rioja.

Premio Empresa Junior 2018 - Noche de las telecomunicaciones y sociedad de la información de La Rioja - Organizado por AITER (Asociación de Ingenieros de Telecomunicación de La Rioja)

Premio Mercurio Innovación e Iniciativa Empresarial 2019 - Premio otorgado por el Club de Marketing de La Rioja.

Premio eDeaSalud2019 - Iniciativa Fundación Pfizer 2019 - eDEA Salud - El desafío de innovar en salud.
